The Honorable Julius Genachowski, Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: Comments regarding DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Chairman Genachowski:

I am again writing in regards to LightSquared's proposed national wireless broadband network. This is an issue I have followed closely and I am hopeful that a win-win solution is finally here and the FCC can allow LightSquared to move forward without delay. It is high time those of us in rural Missouri benefit from LightSquared's network which would expand wireless broadband capacity, increase competition, lower prices and create jobs.

The latest proposal, as I understand it, is that LightSquared will forego their spectrum that allegedly created interference problems with GPS devices. This is awfully generous for the company to provide the GPS industry with a sizeable buffer zone at LightSquared's expense. However, in exchange, the company needs the FCC to "share" with the federal government on a different band of spectrum that does not cause interference. Seems like a pretty simple win-win situation to me.

I hope the Commission will approve LightSquared's request to modify its license so it can finally launch its nationwide wireless broadband service for businesses, nonprofits, and individuals like me in Richland, Missouri and elsewhere in the country.

Thank you once again for your consideration.

Sincerely,

Sandra L. Gibson
Richland Care Center, Board Member
